GERMAN DELEGATION

COCOM DOC. 3666

Paris, 9 September, 1959 245146

MEMORANDUM BY THE GERMAN DELEGATION
ON THE DELIVERY TO HUNGARY OF TWO ALTERNATIVE CURRENT TELEGRAPHIC
SYSTEMS

The German authorities have received an application to license the delivery to Hungary of

two alternative current telegraphic systems,
type FM-WT 12/12, for the transmission of 12 teletype
channels for each set,
covered by item 1523,
valued at \$8.101,60

The equipment which is in connection with the equipment for Roumania, mentioned in Cocom Document 3667, is destined for the Hungarian PTT administration. The two sets will be used for the telex-link between Hungary and Roumania.

The bandwidth of the telegraphic system is 240 cycles by channel.

The request is strongly supported by the Federal Ministry of Post and Telecommunication which has complained in the past of the insufficient telex-communications with Roumania. The telex-relations between Germany and Roumania have increased considerably and can work satisfactorily only if the equipment mentioned in this Memorandum and in the Memorandum Cocom Document 3667 have been installed.

The Federal authorities of Post and Telecommunication have drawn the attention to the fact that apart from the telex-communication between the Federal Republic of Germany and Roumania telex-communications from other Free World countries pass by this line as well.

The German licensing authorities are of the opinion that the delivery of the equipment in question is even more in the interest of the Federal Republic of Germany than of Hungary/Roumania. They submit this request on ad-hoc basis and hope that no objections will be raised.

It has to be mentioned that the shipment described in Cocom Document 3667 is part of the total installation and the delivery of the equipment mentioned above can be carried out only if the equipment mentioned in Cocom Document 3667 is authorized as well.
